IXYS Compliance to Conflict Minerals Act of 2009

In 2010, the U.S. Congress passed a law known as the Dodd-Frank Act. The law addresses the sourcing of minerals from the Congo and surrounding countries in Africa. Conflict minerals are defined as columbite-tantalite (coltan), cassiterite, gold, wolframite, tantalum, tin, tungsten and any other mineral or derivative determined by the U.S. Secretary of State to be financing conflict in the above mentioned regions.

IXYS Corporations does not knowingly or condone the use of minerals as outlined in the Conflict Minerals Act. Our corporate compliance program actively engages our suppliers to provide IXYS with the required information regarding their sources of minerals using all the tools available at this time including EICC template GeSIDD vers. 2.0
